

Suozhi Huang

Ph.D. Student in Electrical and Computer Engineering, Princeton University

suozhi.huang@princeton.edu | +1 (201) 600-4936 | [Website](#) | [Google Scholar](#) | [GitHub](#) | [LinkedIn](#)

RESEARCH PROFILE

Ph.D. student at Princeton University working on LLM reasoning, post-training, and agentic systems, with an emphasis on reliable decision-making in dynamic environments. Seeking 2027 research internships in LLM reasoning and AI agents.

EDUCATION

Princeton University

Ph.D. Student, Electrical and Computer Engineering; Advisor: Prof. Mengdi Wang

Princeton, NJ

Sep 2025 – Present

Tsinghua University

B.E., Computer Science and Technology (Artificial Intelligence), Yao Class

Beijing, China

Sep 2020 – Jun 2025

New York University

Exchange Student, Tandon School of Engineering

New York, NY

May 2023 – Sep 2023

RESEARCH EXPERIENCE

Princeton University

Graduate Researcher; Advisor: Prof. Mengdi Wang

Princeton, NJ

Sep 2025 – Present

- Co-developed **CryptoBench**, a dynamic benchmark with 50 monthly expert-curated tasks spanning on-chain analysis, retrieval, and prediction; evaluated 10 leading LLMs in direct and agentic settings.
- Contributed to **AQuA**, two recursively self-improving research-agent systems for quantitative investment; the systems achieved a combined information coefficient of 0.190 on crypto and a held-out Sharpe ratio up to 2.50 on U.S. equities after two-leg costs.

Shanghai AI Laboratory

Research Intern, Formal Mathematical Reasoning; Advisors: Dr. Zheng Yuan and Prof. Dahua Lin

Shanghai, China

Jun 2024 – Oct 2024

- Co-developed critic-guided proof search and expert iteration for **InternLM2.5-StepProver**, improving the miniF2F test pass rate from 54.5% to 65.9%.
- Built the critic-model training and data pipeline, including preference pairs from Lean proof-search trajectories; helped scale expert iteration to 2.19B tokens and more than 20,000 CPU-days.

Anima AI+Science Lab, Caltech

Researcher, Neural Theorem Proving; Advisor: Prof. Anima Anandkumar

Pasadena, CA

Aug 2024 – Jan 2025

- Led and developed **LeanProgress** as first author of the original submission, training a proof-progress predictor on approximately 80K Lean trajectories; achieved 75.8% exact-match accuracy for remaining-step prediction.
- Integrated progress signals into ReProver search, raising the Mathlib4 test pass rate from 41.4% to 45.2%; contributed tooling merged into LeanDojo v2.

New York University

Visiting Researcher, Collaborative Perception; Advisors: Prof. Chen Feng and Dr. Yiming Li

New York, NY

Feb 2023 – Sep 2023

- Co-developed **ActFormer**, a pose-guided Transformer for scalable multi-robot perception that improved AP@0.7 from 29.89% to 45.15% while using approximately 50% fewer BEV queries.
- Adapted V2X-Sim to MMDetection3D and led multi-agent camera experiments and ablations; published as a co-first-author paper at ICRA 2024.

SELECTED PUBLICATIONS

AQuA: Recursively Self-Improving Quantitative Trading Research Agents

TECHNICAL SKILLS

Programming	Python, C++, Lean 4, Coq
Machine Learning	PyTorch, supervised fine-tuning, preference modeling, critic-guided search, LLM-agent evaluation
Systems and Tools	Linux, Git, OpenCV, MMDetection3D, LeanDojo, ReProver

HONORS

NeurIPS 2025 Best Paper Award (coauthor)	2025
Gold Award, 36th Chinese Physics Olympiad (Top 30 nationally)	2019
